

NETFLIX GLOBAL ANALYSIS

Strategic Insights Report | 1925 - 2020

PROJECT SUMMARY

This report summarizes the data analysis of Netflix's global content library, focusing on trends, demographics, and regional distributions. The project utilized **Python** for data cleaning and **Power BI** for visualization.

6,151 TOTAL TITLES	557 COUNTRIES REPRESENTED
69% MOVIES	31% TV SHOWS

KEY CONTENT INSIGHTS

- **Growth Peak:** Netflix experienced its highest growth in content uploads in **2019**.
- **Audience Segmentation:** Using DAX logic, content was divided into **Adults (18+)**, **Teens (14+)**, and **Kids**. Adult content is the most dominant category.
- **Top Genres:** **Documentaries** and **Stand-up Comedy** hold the top positions, followed by International Dramas.
- **Oldest vs. Newest:** Data covers a vast timeline from 1925 to 2020.

GEOGRAPHICAL DISTRIBUTION

Netflix's global presence is led by the **USA** at rank #1, with **India** holding a strong 2nd position globally.

Top Countries by Region:

- **Asia:** India, Japan, South Korea
- **Europe:** UK, Spain, France
- **North America:** USA, Canada, Mexico

TECHNICAL METHODOLOGY

The analysis followed a rigorous data lifecycle:

- **CLEANING** Handled null values and corrected rating field errors using Python Pandas.
- **MODELING** Built complex DAX measures for segmentation and time-series analysis.
- **VISUALIZATION** Created an interactive Power BI dashboard with country-specific filters.
